b7c

The evidence described below is enclosed for examination by the FBI laboratory. This evidence is being submitted in connection with an official investigation of a criminal matter. It has not, nor will it be, submitted to the same type of technical examination by other experts.

Description of Evidence

Two envelopes and letters enclosed containing death threats and addressed to a juvenile female residing in the town of New Canaan. *ET one way + 5 pages*

Examination Requested

- A cryptanalysis of the above letters, and manufacturer and type of paper
- A psycho-linguistic examination of the writer's style and/ and envelope personality profile.
- An examination of the two letters for development of possible latent fingerprints for possible later comparison.

Statement of Facts

Upon investigation of complaint # 4445-88, received on 4/14/88 by the New Canaan Police Department, it appears that the writer of the two letters is a copycat writer, using a book on the original Zodiac killer authored by Robert Graysmith as a basis and reference for the letters.

For further information, please refer to supplement report of incident #4445-88, enclosed.

DE 95-28-1651

Respectfully submitted

Q5 Page three beginning "eat pepper-mint and ..."

Q6 Page five beginning "you the other ..."

Result of examination:

Document

The original "Zodiac" case involves numerous letters and cryptograms related to murders in the Sacramento - San Fransico area in the late 1960's and early 1970's. The "Zodiac" case has not been solved to date.

The Q1 through Q6 material resembles the type of letters and cryptograms involved in the "Zodiac" case.

No indented writing was observed on Q1 through Q6. No watermarks were observed on Q1.

The brand "Conqueror" appears on Q3. This appears to be a brand of the Sloan Paper Co., Doraville, Georgia.

Q2 and Q4 through Q6 bear watermarks of Sheaffer Eaton, Pittsfield, Massachusetts.

Cryptanalysis

Specimens Q2 and Q6 contain substitution system with variants. In such a cryptosystem, each letter of the alphabet is replaced by one or more symbols to make the message unreadable. The letters which occur more frequently in the English language have more than one ciphertext equivalent.

The substitution system is as follows:

<u>Plaintext:</u>	A	B	C	D	E	F	G	H	I	J	K	L	M
<u>Ciphertext:</u>	G	V	E	F	Z	J	R	M	Δ		/	■	∅
	S			φ	9	Q		⊖	*			□	
	J				E				P			B	
					⊙				u			■	
					+								
					W								
					N								

<u>Plaintext:</u>	N	O	P	Q	R	S	T	U	V	W	X	Y	Z
<u>Ciphertext:</u>	○	∩	π		⊥	F	H	γ	▷	A		□	
	∧	⊕			ρ	⊖	∩						
	∂	τ			\	▲	●						
	φ	χ				K	L						
						Δ							

The cryptographic equivalents used in specimens Q2 and Q6 are the same as those used in the original "Zodiac" cipher; both the original ciphertext and its decryption have been published. However, the following differences should be noted between the cryptograms in the submitted specimens and the cryptograms authored by "Zodiac:"

(1) The longer "Zodiac" ciphers were inscribed into a rectangle. The end of the first ("solved") cryptogram, when deciphered, was unintelligible; the author apparently used the cipher symbols to complete the rectangle. Since the second cipher remains unsolved, it is not known whether any nulls are used to complete the rectangle. The cryptogram in specimen Q2 does not follow the same pattern of inscribing the message into a complete rectangle (i.e., the last line of the cryptogram contains only 3 symbols).

(2) The "Zodiac" cryptograms contained 17 symbols per row. The cryptogram in specimens Q2 and Q6 contain 13 symbols per row.

The decryptions of specimens Q2 and Q6 follow. Garbled portions of the plaintext have been corrected; these corrections are underlined>.

Specimen Q2

[REDACTED] MUST DIE FOR HER FIFTY MEGAHERTZ SCREECH
 AND HER FLIRTATIOUSNESS SHE IS SO IMPOSSIBLY
 SHALLOW AND STUCK UP

b6
 b7c

Specimen Q6

[REDACTED] IF YOU WISH TO KNOW MY IDENTITY YOU WILL
 HAVE TO PUT SOME EFFORT INTO IT NOT FIDDLE AND
 FART AROUND HERE IS A CLUE AS MISSUS [REDACTED] IF
 SHE REMEMBERS WHO DRAWS THE SYMBOL THEN YOU WILL
 HAVE ME GOOD LUCK

(over)

Disposition of the Evidence

The disposition of Q1 through Q6 will be furnished with the fingerprint report. The results of the linguistics examination will be furnished separately. Representative photographs of Q1 through Q6 are retained.

Result of examination:

Specimens Q2 and Q6 contain a substitution system with variants. In such a cryptosystem, each letter of the alphabet is replaced by one or more symbols to make the message unreadable. The letters which occur more frequently in the English language have more than one ciphertext equivalent.

The substitution system is as follows:

<u>Plaintext:</u>	A	B	C	D	E	F	G	H	I	J	K	L	M
<u>Ciphertext:</u>	G	v	∃	7	Z	∫	R	M	Δ		/	◻	⊙
	S			⊕	q	Q		⊖	κ			◻	
	J				ε				κ			β	
					⊙				u			■	
					+								
					w								
					N								
<u>Plaintext:</u>	N	O	P	Q	R	S	T	U	V	W	X	Y	Z
<u>Ciphertext:</u>	o	∫	κ		∫	F	H	Y	∫	A		◻	
	Λ	∫			∫	∫	H						
	∫	∫			∫	∫	I						
	∫	X			∫	∫	∫						
					∫	∫	∫						

The cryptographic equivalents used in specimens Q2 and Q6 are the same as those used in the original "Zodiac" cipher; both the original ciphertext and its decryption have been published. However, the following differences should be noted between the cryptograms in the submitted specimens and the cryptograms authored by "Zodiac:"

- (1) The longer "Zodiac" ciphers were ~~inscribed~~^{inscribed} into a rectangle. The end of the first ("solved") cryptogram, when deciphered, was unintelligible; the author apparently used the cipher symbols to complete the rectangle. Since the second cipher remains unsolved, it is not known whether any nulls are used to complete the rectangle. The cryptogram in specimen Q2 does not follow the same pattern of inscribing the message into a complete rectangle (i.e., the last line of the cryptogram contains only 3 symbols).
- (2) The "Zodiac" cryptograms contained 17 symbols per row. The cryptograms in specimens Q2 and Q6 contain 13 symbols per row.

The decryptions of specimens Q2 and Q6 follow. Garbled portions of the plaintext have been corrected; these corrections are underlined.

Specimen Q2

[REDACTED] MUST DIE FOR HER FIFTY MEGAHERTZ SCREECH
AND HER FLIRTATIOUSNESS SHE IS SO IMPOSSIBLY

Dear [redacted] 1/6

This is the Zodiac speaking
I am back with you.

I am rather unhappy
because you have not worn
a nice ϕ button. So I
now have a little list.
As someday it may happen that
a victim must be found, I've
got a little list, I've got a
little list - of society
of funders who might well
be underground, and who never
would be missed - who never would
be missed. There's the pestilentule

nuances who write for ^{2/6} autographs
- All people who have flabby hands and irritating
- All children who are up in ^{laughs} dates and floor you with 'im flat.
- All people who in shaking hands, shake hands with you: like that, and all third persons who on spoiling tete-a-tete's insist, They'd none of them be missed, they'd none of them be missed! And that nigger sirenader and the others of his race, And the piano-organist - I got him on the list - And the people who

80426031 D LL Q4

eat pepper-mint and
put it in your face,
They never would be missed,
They never would be missed,
Then the Idiot who phrases
with inthousiastic tone, All cen-
-turies but this, and every
countrie but his own.
There's the diva from
New Canaan town whose voice
is much too high, And who'd better
watch herself because her end is
nearly nigh - She's a singular
anomaly, this teenage sopranoist
- I don't think she'd be missed,
I'm SURE she'd not be missed.
But it doesn't really matter whom
you place upon the list, For they'd none

80426031 D LL Q5

FBI
LABORATORY

of 'em be missed, They'd
none of 'em be missed. 4/6

You remind me of a woman who

I gave a rather interesting
vide for a couple hours one
evening twenty years back.

By the way, have you cracked
that last cipher I sent you?

Someone really smart would
need to help you with that as
you are too shallow for anything
on the order of multiple substitution
ciphers. School children make
nice targets, I think I shall
wipe out a school bus some morning,
just shoot out the front tire and
then pick off the kiddies as they come
bouncing out. I was the one who called

80426031 D LL Q5

FBI
LABORATORY

you the other
night. Please wear a nice 5/6
¢ button or you will
be next on my "list" of slaves
for afterlife. I hope your
friends enjoy it when I have

my "blast". Bang, bang! Yours truly:
He plunged himself into the billowy
wave and an echo arose

EXAMINATION REQUESTED BY: Addressee
SPECIMENS: Two envelopes, Q1 and Q3
Pages of letters, Q2, Q4, Q5, and Q6

The listed Q specimens are further described in a separate Laboratory report.

The specimens were examined and twelve latent fingerprints of value were developed on Q1 through Q5.

Photographs of the latent prints are available for any future comparisons you may request.

The specimens are enclosed.

LABORATORY LINGUISTIC ANALYSIS

This is in reply to your letter of April 21, 1988, and will supplement the Laboratory report wherein the submitted specimens are described and their disposition set forth.

A forensic linguistic examination was conducted on photocopies of Q1 through Q6, and a review was made of the police report dated 4/21/88. It was determined that, inasmuch as these letters so strongly resemble the original "Zodiac" letters, very little demographic information can be gleaned concerning the author. The two forms of the state abbreviation used on the envelopes provide conflicting indicators concerning the author's age; however, the use of "diva" may indicate an older (adult) person (unless, of course, this appears in the Gilbert and Sullivan operetta somewhere), and also the use of "nigh," although this is simply a poetic use, and thereby could be used by any age. The familiarity with the operetta, if not obtained merely from the "Zodiac" association, and the interest in the girl's singing, could indicate a particular interest in music or the stage (a music or drama teacher?).

MAIL ROOM

Chief of Police

Since application of linguistic methodology to forensic science is a relatively new technique and its reliability is as yet unproven, linguistic examinations are provided for investigative assistance only, and are not intended for testimony.

Photocopies of Q1 through Q6, and the police report, have been sent via Federal Express mail to the FBI's outside consultant [redacted] for psycholinguistic analysis. He will communicate his results directly to you.
