Dear Draft-board no. 58

This is strange concepts today so I'll think you will understand. I have a lot of them now since they take care with me here in Tibouron and not laughing they make it seem like there is only me and no stumbles of other me, when I have my graines still. Their voice still has a fog bank tone on it but guru says its all a mandala. So I just want you to understand. Here is a picture so you can understand better.
if you want to know

like his masters voice

of color like

fog bank

TIBOURON

mandala (like a voice)

Sometimes when I take the migraine pill it does this fog bank again and other time different.
